

GENDER WHEEL AND APPROACH

Body, gender, and relationship diversity exist across all realms of life, but we have been unable to see it because of a binary-based culture.

If we want to make sense of our planet's infinite diversity, re-establish inclusive human respect, and show how 2SLGBTQIA+ people are a necessary and valuable part of the BIG PICTURE—we must return to Nature's lens.

Based on Nature's cycles, circles, and continuums, the Gender Wheel is a hands-on educational tool that transforms our thinking and understanding through interactive play. This makes new ideas about the reality of Nature's infinite diversity easier to grasp.

The Gender Wheel Ed Tool translates into real life action through the Gender Wheel Approach. This is a 3-step process that interrupts and remedies the falsehoods we continue to be taught about Nature that lead to binary thinking.

The three steps are rooted in the Gender Wheel Main Principles:

- 1** **Nature-based:** learn through Nature's lens the patterns of body, gender, and relationship diversity across all life and our place in it
- 2** **Decolonized/non-patriarchal:** find out what has been overlaid onto Nature's rich and necessary diversity to obscure it and *why*
- 3** **Holistic:** return to Nature's continuums and transform language, thinking, sense of self, understanding of the world, mental health, social dynamics, systemic structures, and more

The Gender Wheel Ed Tool and Approach are not focused on roles and identities, definitions and ideologies, or politics. Although those will be impacted, this is ultimately Nature's work.

It's not about one community. Although those not conforming to the binary are impacted the most. **This is about all of humanity.**

If we want to eradicate gender oppression in our lifetime we must teach the truth of Body, Gender, and Relationship Diversity to EVERYONE!

Together we can change the BIG STORY and FREE us all from the false binary!
